This dialogue to be shared directly to The San Bernardino Sun in person.

Doctor Veronica Kelley,
Director San Bernardino County Department of Behavioural Health,

My name of course is James Martin Driskill. You and I must have a discussion of frankness urgency.

Over the past three years, with failure after failure in the mental health services with the County resources since my return back to my hometown of San Bernardino in July of 2017, there has been an obvious documented bias and coverup campaign to not bring forward into view and therapeutic resolves of matters of life circumstances that must be taken into view that account of truth.

The reasons to hold a line of silence in any kind of official capacity to not bring forward these matters no longer can be maintained.

Throughout my entire experiences with these service interfaces since July of 2017, it has been my priority to tell the truth of my past, present, and expected future to what is an never ending involvement of criminal activities that I am being targeted and victimized with effectively no law enforcement willing to properly take thier duty to protect me from these acts of hate, harassment, and what is systemic structure of psychological abuse of my life that was established to have begun in 2005 and continues into current day (most recently documented a week ago).

This was written to the San Bernardino County District Attorney's Office in September.

<http://webdomains.realuphuman.net/sbcountyda.org/Email/Gmail-SRFaxTransmissionSuccessfultoMikeiSocialCopBires-URGENT%20PROCESSING-1-909-382-7674-onSep12-20-03-06AM.html>

(Do listen to all documented call recordings with the San Bernardino District Attorney's Office / Mike 'iSocialCop' Bires)

As time has shown itself this malice force involved to be a never ending presence in my life, the goals to which have effectively dislodged me from my self internal capability of maintaining and living a stable life above its eventual crisis and collapse and most drastic my death from these involved influences that are being intentionally ignored for any kind of rational reasons of commons to remedy.

I am once again in perpetual crisis not of my own doing of actions or behaviors. These are provable external forces that are at the major fault.

This perpetual affect is scholarly mentioned in research findings in health related documentation of what is happening in all of this that must (unconditionally) be received and placed into proper perspectives and policy countywide to address these need of educational knowledge to all service providers especially in mental health services.

This to redefine the truth from a myth that has been widely established in the terms of these on the Internet erroneously declaring the mistaken association to those dealing with this reality are suffering delusions including some kind of mass hysteria of copy-cat story narratives in public posts online. The [NIH.GOV](#) document disproves that assertion.

When I got into town from Denver, I knew the basic source to which I was dealing with this hate, including agency and person's individual names. I had not yet been exposed to the term that the culture that defines it. I had been using a different social media term.

#ConspiracyExposedTerminatesASAP

This the source of harassment but not a single one of the local San Bernardino social services or the therapeutic interfaces of the Department of Behavioral Health in this County of San Bernardino, or my attempts to contact local police department, sheriff's office and outward contact to the Federal Bureau of Investigation were naturally receptive.

None of these resources would allow me to hold the story forward for corrective adaptive process of returning my life to a natural state of living successfully and healthy within the community free of these mental health intentional abuses.

My first interface here in San Bernardino in 2017 was with Dr. Berger of the at the County Department Behavioral Health. I had exchanged with Doctor Berger with 2 separate discussion sessions that were 2 1/2 hours each for an intense consult of 5 hours that drew no influence to assist me, but was actually took a inverted course into a criminal complaint against me based on my writings directed to the FBI that I copied and faxed Doctor Berger. The 5 hours of consult time should have formed the understandings if supported. But that time was actually used to harm me to retain the status quo powers overseeing this conspiracy. (fact!)

This is when I describe what had happened to me in Denver. And this was well before I understood what is the term gangstalking.

At each one of these interfaces to your Department's offered Mental Health Services fail by way of not being able to correctively adapt the foundational elements of the problem. There is a conspiracy here to not be able to bring forward the truth. (fact!)

This is a coverup and protection by persons in community leadership roles to wrongdoing that is criminal in nature against me specifically.

Instead of a compassionate tone of my social services and my mental health interfaces and my HIV Health interfaces, I get a complete opposite shut off terminated from services when I bring up these matters into some sort of introduction conversation of community hate for some sort of remedy. (fact!)

For reaching out, I will not allow myself to know the truth and to just sit down and shut the fuck up.

Denver HIV Care:

<http://Doctor-Nancy-Ellen-Madinger.fuckeduphuman.net>

San Bernardino HIV Care:

<http://doctor-eric-tomomi-shigeno.fuckeduphuman.net/vitals.com-reviews/>

The events of termination with Doctor Shigeno was March 2019 and is the very last HIV doctor assigned in my healthcare. I have been without HIV Medication treatment since April 2020 when Doctor Shigeno suddenly passed away on April 10th - reported cause was suffering a stroke. Even though this days after the release of the NIH document on gangstalking and about a week and a half after I violated the restraining order between Dr. Shigeno. I have high suspicion that he died from SUICIDE (no proof), no matter , the stress of his involvement in this conspiracy might as well explain such an event of stroke.

For me to have to shut up about the truth for the benefit that if I don't shut up, I will not have services available to me. This is obviously showing as my punishment for standing up.

I'm trying to resolve this life destructive forces that has and continue to target me that has already destroyed my life and will not allow my life to be placed upright back into tracks of successful living in our community.

For which the other persons including doctors and case managers people and you too specifically Doctor Veronica Lynn Kelly are inclusive of these accusations and confrontation of the truth.

Because you will not have discussion about these real truth matters with me for no fucking reason.

So you would like to rather have a mental health illness case forever instead of putting the correct necessity placements of adaptive solutions into place and actually heal me and

actually begin again wellness.

To fight what is designed to kill me from the abuse that you are protecting, you are in enabling, that you are condoning, and perhaps you are actually engaged in actual acts against me and other community members besides me.

How I define this conclave agenda outside of my very controls are predefined as a pattern recognizable from above me set down upon me from leaderships of community resource that repeats in an dysfunctional path of services terminated and services disenfranchised from real true resource benefit to set into an actionable affect of life stabilization.

These are described as causes or reasons for the reported conditions of malicious activity in the April 6th 2020 finally on the National Institutes of Health repository of health related document that becomes viewable of research findings paper on what is gangstalking.

That is the subject to which you must talk and discuss matters with me you have no choice you have no conscience to allow this matter to go on without an address in silence for that silence in itself is a man that proves you're a willing party in a conspiracy.

It has been more than two months I've been asking nicely sometimes not so nicely but you have obviously shown your cards to remain silent forever more to cover up and to condone and enable a conspiracy of gangstalking in this County.

It is a haters system... Does not relate a very kind heart you have Dr. Kelley.

Because you know exactly who I am my history and all of this and you have chosen to completely bar out and wall out my voice of the real things that have happened in this County with my case.

This because you know I have it on the web... And I have been talking about it to all your staff...

Now even try to reinterface to your crisis team, which I should be already showing as active with Wendy Ann Holmquist crisis case manager, which she abandon and never provided a single act of benefit to my case even though I had asked her for several things.

She never follow through with a single thing a single action of benefit in my case and that is a fact.

So is today is December 15th is it only 10 days to Christmas.

I am imploring the fact I have your background check report and your relatives into view.

I am reaching out to every single one of them one by one and their email addresses and perhaps even phone calls to which I described that you are a conspirator and that you are guilty of killing people addressed in this regime that you are protecting.

By just mere fact that you will not have a proper level discussion about these matters, to a resolve of these matters, even have your crisis team properly handle the text interface on to

the voice interface, in all of it - everything points to your guilt of knowledge of these circumstances into question of United States Code Title 18, Section 241 Conspiracy Against Rights and United States Code Title 18, Section 242 Deprivation of Rights by Color of Law

What is showing they can't even comply with simple conversation that makes any logic sense for example.

Michelle on my first attempt I'm saying just the phrase:

"On twitter" and she and interrupt me just tell me that she doesn't have an account on Twitter. As of what I'm telling her which I'm about to tell you again here is irrelevant that she's on Twitter or not. Text interrupting me at as if my discussion point is off topic and not allowed.

I said Twitter is a real thing of our real world right? So I should be able to discuss things that are on Twitter right? So here we go again.

On Twitter, Dr. Kelley and my interaction began when I responded to a message about suicide and beginning the conversation about suicide

That is what I wanted to say but she interrupts me why because what I said is true and what is going on here doctor Kelly is absolutely Insanity of immorality of an ethical bias that should be fired for your conduct unbecoming the director of the Department of Behavioral Health.

Your conduct unbecoming a doctor in itself and your conduct unbecoming any kind of responsible family relative that I would see in the background check reports you are a disgrace and an embarrassment to your family.

Where your family relatives background check return results from Truthfinder are being used in this extreme circumstances of nonfeasonace that must be broken if its silence

i've already begun with the first relative listed onto your report.

Since these are a part of your background check report returns perhaps there is an actual reason to use them.

That is exactly what I am doing here. This is not doing anything wrong considering the current circumstances of dire extreme.

Contacting each one of your family relatives.

Who is going to step up and actually be the representative of this family collective that actually reprimands you Doctor Veronica Kelley into being a decent person and into compliance of any kind of decency?
